

What is claimed is:

1. A method for providing feedback, said method comprising the steps of:
  - a) forwarding a query pertaining to a structured entity having a plurality of  
5 parts
  - b) forwarding a plurality of response templates; and
  - c) receiving a response from a first client device, wherein said response comprises at least one of said response templates related to at least one part of said structured entity.
- 10 2. The method of claim 1, further comprising the step of:
  - d) receiving a response from a second client device, wherein said response comprises at least one of said response templates related to at least one part of said structured entity.
- 15 3. The method of claim 2, further comprising the step of:
  - e) aggregating said responses from said first and second client devices to produce an aggregated result.
- 20 4. The method of claim 3, further comprising the step of:
  - f) forwarding said aggregated result to said first client device or said second client device.
- 25 5. The method of claim 2, further comprising the step of:
  - e) forwarding said response of said first client device to said second client device.
- 30 6. The method of claim 1, wherein said structured entity comprises a sequential multi-step process.
7. The method of claim 1, wherein said structured entity comprises a literary work or a portion of a literary work.

8. The method of claim 7, wherein said literary work is a poem.

9. The method of claim 1, wherein said structured entity comprises a computer program.

5

10. The method of claim 1, wherein said structured entity comprises a musical composition.

11. The method of claim 1, wherein said structured entity comprises a

10 biological organism.

12. The method of claim 1, wherein said structured entity comprises a computer data structure.

15 13. The method of claim 1, wherein said structured entity comprises an architectural structure.

14. The method of claim 1, wherein said structured entity comprises a chemical process.

20

15. The method of claim 1, wherein said response contains an input entered by using said first client device.

16. The method of claim 15, wherein said input comprises filling in said at  
25 least one response template.

17. The method of claim 15, wherein said input comprises linking said at least one response template to at least one part of said structured entity.

30 18. The method of claim 15, wherein said input comprises linking a plurality of parts of said structured entity.

19. The method of claim 1, wherein said query is a multi-part complex query.

20. The method of claim 1, wherein said input comprises at least one tag.
21. A method for providing feedback, said method comprising the steps of:
  - 5 a) receiving a query pertaining to a structured entity having a plurality of parts;
  - b) receiving a plurality of response templates; and
  - c) providing a response to an aggregating device from a first client device, wherein said response comprises at least one of said response templates related to at least one part of said structured entity.
- 10
22. The method of claim 21, further comprising the step of:
  - d) providing a response to the aggregating device from a second client device, wherein said response comprises at least one of said response templates related to at least one part of said structured entity.
- 15
23. The method of claim 22, further comprising the step of:
  - e) requesting for an aggregated result of said responses from said first and second client devices.
- 20
24. The method of claim 23, further comprising the step of:
  - f) receiving said aggregated result.
- 25
25. The method of claim 22, further comprising the step of:
  - f) receiving said response of said first client device by said second client device.
26. The method of claim 21, wherein said structured entity comprises a sequential multi-step process.
- 30
27. The method of claim 21, wherein said structured entity comprises a literary work or a portion of a literary work.

28. The method of claim 27, wherein said literary work is a poem.

29. The method of claim 21, wherein said structured entity comprises a computer program.

5

30. The method of claim 21, wherein said structured entity comprises a musical composition.

31. The method of claim 21, wherein said structured entity comprises a

10 biological organism.

32. The method of claim 21, wherein said structured entity comprises a computer data structure.

15 33. The method of claim 21, wherein said structured entity comprises an architectural structure.

34. The method of claim 21, wherein said structured entity comprises a chemical process.

20

35. A computer-readable medium having stored thereon a plurality of instructions, the plurality of instructions including instructions which, when executed by a processor, cause the processor to perform the steps comprising of:

25 a) forwarding a query pertaining to a structured entity having a plurality of parts

b) forwarding a plurality of response templates; and

c) receiving a response from a first client device, wherein said response comprises at least one of said response templates related to at least one part of

30 said structured entity.

36. The computer-readable medium of claim 35, further comprising the step of:

d) receiving a response from a second client device, wherein said response comprises at least one of said response templates related to at least one part of said structured entity.

5 37. The computer-readable medium of claim 36, further comprising the step of:

e) aggregating said responses from said first and second client devices to produce an aggregated result.

10 38. The computer-readable medium of claim 37, further comprising the step of:

f) forwarding said aggregated result to said first client device or said second client device.

15 39. The computer-readable medium of claim 36, further comprising the step of:

e) forwarding said response of said first client device to said second client device.

20 40. The computer-readable medium of claim 35, wherein said structured entity comprises a sequential multi-step process.

41. The computer-readable medium of claim 35, wherein said structured entity comprises a literary work or a portion of a literary work.

25

42. The computer-readable medium of claim 41, wherein said literary work is a poem.

30 43. The computer-readable medium of claim 35, wherein said structured entity comprises a computer program.

44. The computer-readable medium of claim 35, wherein said structured entity comprises a musical composition.

45. The computer-readable medium of claim 35, wherein said structured entity comprises a biological organism.
- 5 46. The computer-readable medium of claim 35, wherein said structured entity comprises a computer data structure.
47. The computer-readable medium of claim 35, wherein said structured entity comprises an architectural structure.
- 10 48. The computer-readable medium of claim 35, wherein said structured entity comprises a chemical process.
49. The computer-readable medium of claim 35, wherein said response  
15 contains an input entered by using said first client device.
50. The computer-readable medium of claim 49, wherein said input comprises filling in said at least one response template.
- 20 51. The computer-readable medium of claim 49, wherein said input comprises linking said at least one response template to at least one part of said structured entity.
52. The computer-readable medium of claim 49, wherein said input  
25 comprises linking a plurality of parts of said structured entity.
53. The computer-readable medium of claim 35, wherein said query is a multi-part complex query.
- 30 54. The computer-readable medium of claim 35, wherein said input comprises at least one tag.

55. A computer-readable medium having stored thereon a plurality of instructions, the plurality of instructions including instructions which, when executed by a processor, cause the processor to perform the steps comprising of:

- 5        a) receiving a query pertaining to a structured entity having a plurality of parts;
- b) receiving a plurality of response templates; and
- c) providing a response to an aggregating device from a first client device, wherein said response comprises at least one of said response templates related to at least one part of said structured entity.

56. The computer-readable medium of claim 55, further comprising the step of:

- d) providing a response to the aggregating device from a second client device, wherein said response comprises at least one of said response templates related to at least one part of said structured entity.

57. The computer-readable medium of claim 56, further comprising the step of:

- 20        e) requesting for an aggregated result of said responses from said first and second client devices.

58. The computer-readable medium of claim 57, further comprising the step of:

- 25        f) receiving said aggregated result.

59. The computer-readable medium of claim 56, further comprising the step of:

- f) receiving said response of said first client device by said second client device.

60. The computer-readable medium of claim 55, wherein said structured entity comprises a sequential multi-step process.

61. The computer-readable medium of claim 55, wherein said structured entity comprises a literary work or a portion of a literary work.

5 62. The computer-readable medium of claim 61, wherein said literary work is a poem.

63. The computer-readable medium of claim 55, wherein said structured entity comprises a computer program.

10 64. The computer-readable medium of claim 55, wherein said structured entity comprises a musical composition.

15 65. The computer-readable medium of claim 55, wherein said structured entity comprises a biological organism.

66. The computer-readable medium of claim 55, wherein said structured entity comprises a computer data structure.

20 67. The computer-readable medium of claim 55; wherein said structured entity comprises an architectural structure.

68. The computer-readable medium of claim 55, wherein said structured entity comprises a chemical process.

25 69. An apparatus for providing feedback, said apparatus comprising:  
means for forwarding a query pertaining to a structured entity having a plurality of parts and for forwarding a plurality of response templates; and  
means for receiving a response from a first client device, wherein said

30 response comprises at least one of said response templates related to at least one part of said structured entity.

70. The apparatus of claim 69, wherein said means for receiving further receives a response from a second client device, wherein said response comprises at least one of said response templates related to at least one part of said structured entity.

5

71. The apparatus of claim 70, further comprising:  
means for aggregating said responses from said first and second client devices to produce an aggregated result.

10 72. The apparatus of claim 71, wherein said forwarding means further forwards said aggregated result to said first client device or said second client device.

73. The apparatus of claim 70, wherein said forwarding means further  
15 forwards said response of said first client device to said second client device.

74. An apparatus for providing feedback, said apparatus comprising:  
means for receiving a query pertaining to a structured entity having a plurality of parts and for receiving a plurality of response templates; and  
20 means for providing a response to an aggregating device from a first client device, wherein said response comprises at least one of said response templates related to at least one part of said structured entity.

75. The apparatus of claim 74, wherein said means for providing further  
25 provides a response to the aggregating device from a second client device, wherein said response comprises at least one of said response templates related to at least one part of said structured entity.

76. The apparatus of claim 75, further comprising:  
30 means for requesting for an aggregated result of said responses from said first and second client devices.

77. The apparatus of claim 76, wherein said receiving means further receives said aggregated result.

78. The apparatus of claim 75, wherein said receiving means further receives  
5 said response of said first client device by said second client device.

79. A system for providing feedback, said system comprising:  
a first client device; and  
an aggregating device for forwarding a query pertaining to a structured  
10 entity having a plurality of parts and a plurality of response templates to said  
first client device, where said aggregating device receives a response from said  
first client device, wherein said response comprises at least one of said  
response templates related to at least one part of said structured entity.
